GARY CHEN

Computer Science | AI Product Engineer | Agentic AI | AI API | Computer Vision

Bandung, Indonesia | +62 895 3887 33328 | garychen8899chen@gmail.com | garychen.site

Computer Science student at BINUS University (GPA 3.50) with a strong passion for Artificial Intelligence and Automation. Experienced in designing deep learning models, building automated AI workflows. Dedicated to positive social impact through analytical problem-solving, technology, research, and community service.

EDUCATION

Bina Nusantara University | Computer Science 2024 – 2028

- GPA: 3.50/4.00 (through 4th semester)
- BINUS Cross Institutional Semarang-Bandung.
- Engaged in strategic research, AI Integration, and collaborative projects.

HONORS, AWARDS & ACHIEVEMENTS

- **Presenter – ICISS 2026 –** Delivered a technical presentation on *Comparative Performance of Lightweight CNN Architectures for Coffee Bean Quality Classification* to global academic peers.
- **Competition – BINUS Startup Vaganza 2026 – Semi-Finalist –** Pitched a business plan for "AKANG", featuring a conceptualized AI workflow for livestock asset management to improve valuation transparency.

RESEARCH & PROJECTS

Comparative Performance of Lightweight CNN Architectures for Coffee Bean Quality Classification

September 2026 | Published & Presented at ICISS 2026

- Benchmarked 6 CNN architectures using PyTorch and OpenCV on a 1,890-image dataset to solve manual sorting inefficiencies.
- Identified Inception-V3 as the optimal model, achieving a top-tier test accuracy of 91.0% and an F1-score of 0.9075.

Aphrydite AI – Automated News Curation & Multi-Platform Publishing Bot

Personal Project | Python, Playwright, Telegram API, MiniMax AI API, Threads API

- Engineered a real-time curation pipeline integrating Google News RSS and **OpenAI-compatible APIs (MiniMax)** into a Telegram bot control center for automated summarization.
- Automated HTML-to-video rendering using **Playwright** to generate visually consistent content layouts, seamlessly auto-posted cross-platform via the **Threads API**.

CoffeVision Pro – AI-Powered Coffee Bean Quality Inspection Web App

Personal / Applied AI Project | Python, PyTorch, OpenCV, Flask, Hugging Face

- Developed and deployed an end-to-end Flask web application on Hugging Face to automate multi-class coffee bean grading (flat, defective, long, perfect) using a pre-trained deep learning model.
- Integrated OpenCV and Python to build interactive features supporting real-time camera streaming, file uploads, and automated geometric measurements (aspect ratio and circularity).

TechSignal Intelligence – An AI-Powered Technology Trend Analytics Platform

Team Project | Python, asyncio, httpx, Pydantic, Telegram API, DeepSeek API, OpenAI SDK, HackerNews API

- Designed and integrated custom OpenAI-compatible LLM workflows into an asynchronous pipeline to automate text curation and trend analysis from Hacker News datasets.
- Implemented robust AI fallback and partial-failure recovery mechanisms, ensuring raw data persistence and system resilience when LLM timeouts or failures occur.

COMMUNITY SERVICE EXPERIENCE

YAYASAN PANTI ASUHAN KRISTEN EUNIKE SEMARANG – VOLUNTEER October 2024

- Spearheaded a creative entrepreneurship and practical crafting curriculum for 8 orphaned youths, teaching digital promotion and relationship-building to foster financial self-sufficiency and inspire business ventures.

KELURAHAN KROBOKAN SEMARANG – VOLUNTEER March 2025

- Led a technical presentation and hands-on biopori construction workshop for 8 participants, including the village head, demonstrating sustainable techniques to mitigate local flooding and build environmental resilience.

BINUS BANDUNG – VOLUNTEER June 2026

- Managed interactive learning sessions as a committee member, tutoring 20+ orphanage children in foundational subjects and organizing hands-on origami workshops to stimulate creativity, motor skills, and meaningful connections.

SKILLS

- **Programming:** Python, PyTorch, OpenCV, Flask, NumPy, Pandas, Matplotlib, Playwright, HTML, CSS, JS
- **Tools & Platforms:** GitHub, Hugging Face Spaces, OpenAI API, LLM APIs, Telegram Bot API, Meta Threads API, VS Code, Linux/Terminal, Google Cloud Platform, Cloudinary, Figma, Canva
- **Languages**

  Indonesia — Native | English — Pre Intermediate (Beelingua)
